 - Digital Auto Tracking
 - Auto Play
 - Auto Repeat
 - Auto Rewind
 - Auto Eject
 - Auto Power Off

Multifunction
Infrared
Remote

PHILIPS MAGNAVOX

Videocassette Player

picture:

DIGITAL AUTO TRACKING SYSTEM When tape playback begins, this feature automatically seeks the optimum tracking position in the tracking range, and the optimum audio signal tracking position for clearest picture and sound from videotapes. Controls are provided on the remote transmitter to give you manual control should tracking adjustments be necessary.

AUTO HEAD CLEANER Gently, automatically cleans the video head each time a tape is inserted or removed to maintain optimum picture performance during both recording and playback.

- **PLAYBACK IN SP, LP, OR SLP**

convenience:

ON-SCREEN, REAL-TIME COUNTER Unlike the 0000 to 9999 tape counters found in standard VCPs, this unit incorporates a linear, real-time counter which shows elapsed recording and/or playback time in hours, minutes, and seconds.

REPEAT PLAY When the VCP recognizes no recorded signal or reaches the end of a tape with the Repeat Play control activated, it will automatically rewind to the beginning and enter the Play mode again. Repeat Play can be discontinued by touching the button a second time or by changing operation mode.

QUICK START MECHANISM Quickly and effortlessly switches the tape mechanism from Stop to Play in only one second, instead of the approximately 5 1/4 seconds of older models.

AUDIO/VIDEO OUTPUT JACKS Connect your VCP to the direct audio and video inputs of a television receiver or monitor equipped with input jacks, for better picture and sound quality during tape playback. Jacks also allow a VCR to be connected for editing and/or duplicating personally recorded, non-copyrighted videotapes.

special effects:

15X FORWARD/REVERSE LATCHING SEARCH Search in forward or reverse mode at 15 times normal playing speed in SLP, and 5 times normal in SP. The Latching Search feature provides continuous forward or reverse search with a single touch of the control. A second touch stops the search operation and returns the unit to the Play mode.

remote control:

MULTIFUNCTION INFRARED REMOTE Controls all operating features and functions of this Videocassette Player with armchair convenience—including Power, Play, Tracking, FF/Rew/Search, Pause, Stop, and Eject.

additional features:

- Power On
- Digital Auto Tracking
- Auto Play
- Auto Repeat
- Auto Rewind
- Auto Eject
- Auto Power Off
